

## Assignment4: Grade Calculator

**Due: September 16, 2021 (Thursday)**

All programs must be correctly run for them to be considered as accepted submissions. (Per each missing- or unaccepted- submission, your grade will be lowered by one letter grade); The last day to upload the assignments is December 17.

### Objective

In this assignment, you will be practicing more on input, processing, and output.

Code: gradeCalc.cpp

Input: none

Output: none

### Assignment: Grade Calculator

Write a program that calculates the final grade, based on the grade of each deliverable given by the user. The table below shows the weight of each deliverable on their final grade.

| Deliverable             | percentage |
|-------------------------|------------|
| Programming Assignments | 15%        |
| Chapter Tests           | 50%        |
| Final Exam              | 30%        |
| Class Participation     | 5%         |

### Things to consider earning the full credits

Your program will be graded on:

1. The program must be submitted by the due date.
2. The program must run correctly and give an output similar to the sample output.
3. You must adhere to the Department style guide.
